

## Stove training workshop at Kagando Rural Development Center, Kasese, Uganda, March 2011

The Attendees Kitchen at Kagando Rural Development Center (KARUDEC) prior to the stove project.

International Lifeline staff arrive at KARUDEC. The Chapel is pictured above along with nursing school students.

ILF staff at KARUDEC. (L - R) Okola Isaac, Junior Stove Officer; Ewany Patrick, Senior Stove Officer; Ochan Ben, Assistant Trainer; and Nick Salmons, Uganda Program Manager.

Okola Isaac providing instruction on stove building.

The week-long workshop provided in-depth instruction on how to build brick and plaster efficient cookstoves.

A young workshop attendee.

Ewany Patrick demonstrates the features of a fuel-efficient stove.

Workshop attendees were very engaged learners.

Participants worked in groups to practice building stoves.

The workshop included much hands-on experience.

Stoves are built to accommodate both clay and metal saucepans.

One of the groups working together on their first stove.

A stove nearing completion.

One workshop group proudly displays the stove they built.

Plaster for the stoves was created by mixing murram with clay and water.

Only local materials were used to create the plaster.

View of the Attendees Kitchen with the old stoves removed and the insulated bricks arranged. There are six bricks in each stove.

Setting up the bricks along a continuous embankment was an effort to maximize the number of stoves into a relatively small communal kitchen.

Workshop students building stoves in the Attendees Kitchen. Plaster was applied over the insulated bricks.

Cavities for accommodating both clay and metal pots were pressed into the stoves.

This picture shows the openings where fuel is inserted into the stoves.

Completed stoves.

Graduation exercises were held at the end of the week in the Chapel at KARUDEC.

Uganda Program Director Nicholas Salmons awarded Certificates of Completion to 35 people.

14 hospital staff and nursing students attended the training workshop and graduated from the program.

Women were well represented among the 35 graduates. Participants from five sub-counties attended the workshop.

The 35 graduates of the stove training workshop display their certificates and the poster they received outlining each step in the stove construction and maintenance process.
