

# Triple Win!

## For the Earth's Most Vulnerable For the Environment For You

AHEAD Energy is now headquartered in Marietta, offering you an opportunity to invest your time, talents, and resources to ensure that all people can attain a healthy, productive life on a thriving planet.

Because we live with such an abundance of energy, it's easy to forget that billions of our planet's inhabitants do not enjoy the good things that energy brings to life. Access to modern energy is key to overcoming extreme poverty and disability, if pursued in a socially-conscious, environmentally-conscientious manner. This needs to be the next human triumph and cannot happen soon enough.

AHEAD Energy is a Marietta-based non-profit that assists schools and medical facilities in Africa to obtain the energy they need to carry out their work.

### Facts:

- 3 billion people (nearly half of humanity) are on the bottom-most rung of the energy ladder, i.e. their only source of energy is inefficient, highly polluting solid fuels (wood, dung, crop residues).
- 1.6 billion people lack access to electricity.
- Black carbon, i.e. soot, from household cook stoves is contributing 18% to greenhouse gasses that are destabilizing our planet's climate; only fossil fuels contribute more greenhouse gasses.
- Money invested in improved energy services generates a positive economic return in terms of improved health and productivity gains.
